

Programming Assignment #4

Jeremy Giles

Pseudocode:

Import numpy

file_path = Input("Enter file path")

file_contents = open(file_path)

d_matrix = []

e_matrix = []

while i < 3:

 row = []

 while j < 3:

 row.append(pop(file_contents[0]))

 j++

 d_matrix.append(row)

 i++

while file_contents not empty:

 e_matrix.append(pop(file_contents[0]))

np_d_matrix = numpy.matrix(d_matrix)

np_e_matrix = numpy.matrix(e_matrix)

i_minus_d = numpy.identity_matrix - np_d_matrix

inverse i_d = numpy.inverse(i_minus_d)

x = inverse_i_d * np_e_matrix

print(x)
